1. Synopsis

Delete intermediate files.

2. Prerequisites

None.

3. Configuration

DEL_FILES

Prefix of files to delete, e.g. DEL_FILES="dsc ca ais hdr mantiuk
fattal"

IMG_DIR

Working directory. This module never deletes files in \$ORIG_DIR.

4. Description

This administrative module will clean the working directory at the end of your workflow. If you use [mv2archive](#) to move the final results to an archive directory, you should use delInterFiles first.
